

## 500 SERIES SOLID WOOD DOORS

The 500 series are a contemporary solid wood flush doors that boasts a variety of high-grade wood species like mahogany, cedar, oak and ash. Are available as interior doors or exterior front entry doors.

Flush doors are simple doors that feature a plain flat face on both sides. This type of door is more closely associated with function rather than style, but that does not mean the door cannot be an attractive element in the room design.

For room designs where the desire is to highlight other elements in the space, the 500 series could be an excellent choice. Complete the design with a sidelite.

The 500 series doors are available as interior doors or exterior front entry doors. Don't settle for solid "core" when you can get true solid wood doors.
